

Woodland Dunes Native Tree & Shrub Sale

Native, disease-resistant species, grown by reputable nurseries in our climate, and dug immediately before your pick-up, will again be available through Woodland Dunes. These reasonably priced plants are useful for landscaping, wildlife food and cover, windbreaks, timber production, and environmental screens. Our staff will provide advice on planning, planting and managing your trees and shrubs. Limited numbers of trees and shrubs are available; please order early. **ORDER DEADLINE: March 16**

Evergreen Trees

Balsam fir (*Abies balsamea*): used for Christmas trees and as an ornamental • mature height 75' • moist, fertile soils • full to partial sun • soft, bright green needles with pleasant fragrance • 'Provenance 70'

Tamarack (*Larix laricina*): hard wood durable in soil, used for posts, poles and pulpwood • reaches 60' tall • deciduous conifer • grows in wet soils, but also uplands • golden yellow autumn color

White cedar (*Thuja occidentalis*): used for screening or windbreaks • mature height 40' • moist to well-drained soils • full to partial sun • aromatic needles, small cones • deer may browse • 'Affinity'

White pine (*Pinus strobus*): average height 75' • moist to well-drained soils • full to partial sun • soft green needles 3 to 5" long and 5 to 8" cones • a source of food for deer, so may need protection

White spruce (*Picea glauca*): used for Christmas trees, wind breaks, and as ornamentals • mature height 70' • moist, fertile soils • full to partial sun • stiff, green needles

Deciduous Trees

Red maple (*Acer rubens*): all parts used by wildlife • mature height 40 to 65' • tolerates a wide range of conditions • bright red in autumn • narrow rounded crown

Silver maple (*Acer saccharinum*): mature height 50'-70' • full sun to partial shade • mature height 80' • tolerates wide range of soil types •

Sugar maple (*Acer saccharum*): official state tree of Wisconsin • mature height 80' • rich, moist soil • leaves break down quickly to make rich organic fertilizer

Burr oak (*Quercus macrocarpa*): source of food for wildlife • mature height 80' • moist, well-drained soil • resembles white oak

Red oak (*Quercus rubra*): wide, massive shade tree • provides food for turkey, blue jay and ruffed grouse • mature height 70' • prefers dry uplands • leaves turn red in autumn • acorns have smooth caps

Swamp white oak (*Quercus bicolor*): 65 to 80 feet tall • moist, fertile soil, including swamps • acorns eaten by squirrels, wood ducks and other wildlife • tolerates light shade

Shrubs

American Hazelnut (*Corylus Americana*): fast-growing, reaching 5' -10' • full to partial sun • prefers well-drained soil, but tolerant to moist soil • multi-stemmed • best used when naturalizing an area • edible but in fall

Juneberry (*Amelanchier canadensis*): provides food for birds • mature height 8' • prefers well-drained, rich soil, but grows in clay • sun to semi-shade • white flower clusters followed by purple fruit

Nannyberry (*Viburnum lentago*): dark purple berry-like fruit is important for wildlife • mature height 10'-20' • wide range of soils • multi-stemmed trunk, drooping branches, dense round crown • white flowers • grows on edges of forest, swamps, and streams.
